

Private Label & Toll Manufacturing

Custom Adhesives, Sealants & Coatings – Developed or Engineered to Scale With Your Business

Seal Bond is your trusted partner for private label and toll manufacturing of high-performance adhesives, sealants, coatings, and specialty formulations.

With over 25 years of experience, ISO 9001-certified manufacturing, and in-house R&D expertise, we help brands bring reliable products to market faster – without compromising quality, performance, or control.

 25+ years of formulation & manufacturing experience

 Experts in SMP hybrid chemistries, including STPE, STPU, silicone, and more

 ISO 9001-certified manufacturing

 In-house R&D & application engineering

 Scale from 500 g to 500 gal

 Solvent-free & low-VOC capabilities

 Dedicated project management and engineer support

Whether you're launching a new product line, expanding capacity, or outsourcing production, Seal Bond helps you move faster, scale confidently, and protect your brand.

Our innovation. Your success.

Manufacturing Solutions Built Around Your Business

Seal Bond supports both private-label programs and contract (toll) manufacturing, offering flexibility tailored to your business model, timeline, and technical requirements.

Whether you're launching a new product, scaling production, or have a product development need, we align our capabilities to your goals.

Private Label Manufacturing

Build and grow your branded product line.

Build your brand with Seal Bond's proven or custom-developed formulations manufactured under your label and supported by our technical expertise.

Accelerate time to market

Expand or complement your product line

Create new revenue streams

Maintain consistent quality and performance

Best for:

Brands looking to launch or expand adhesive and sealant offerings without investing in manufacturing infrastructure.

Toll (Contract) Manufacturing

Scale production without sacrificing control.

Leverage Seal Bond's production capacity, equipment, and expertise while retaining ownership of your proprietary formulations.

Increase mixing, compounding, or filling capacity

Support short-term or long-term production needs

Maintain control of proprietary formulas

Reduce capital investment and operational strain

New production plant facility added in 2023

Best for:

Companies with existing formulas that need scalable, reliable manufacturing support.

Why Partner With Seal Bond?

We're more than a manufacturer. We act as a technical and operational extension of your team.

Proven Experience & Expertise

25+ years formulating and manufacturing adhesives and sealants
